

## Make your own danbuoy

You can either buy one of those :

**£149.95**

Or decide to do it yourself for €20.

You need :

About 1.3m of PVC tube :

One or two foam tubes (less than a meter)

Several plastic ties :

And an « oscar » flag (you can make it yourself or buy it for €5) :

Then it is just a matter of

- putting the PVC tube in the foam tubes,
- secure the whole with plastic ties,
- drill a hole at the top and
- attach the oscar flag.

You will also need a line to attach to the body like so :

And that's it.

Cut the plastic ties,

Cover the foam with a plastic to protect it

And attach some weight at the bottom, bolts with more plastic ties will do...
